OBJECTIVE

As a final-year Bachelor of Computer Science student at Universiti Teknologi PETRONAS (UTP), expected to graduate in December 2025, I am seeking a full-time employment starting January 2026, where I can apply my technical expertise, problem-solving skills and passion for digital innovation to support organizational growth and transformation. With prior experience from a 7-month internship at PETRONAS Digital Sdn. Bhd., I am eager to contribute fresh ideas and energy while building a long-term career in a dynamic and impactful organization.

SKILLS

- **Programming:** Python, Java, C++, HTML, MySQL, MATLAB, Prolog, CSS, Node.js, React, Next.js, Git, Tailwind, Framer Motion, Android Studio, Firebase
- **Software** : Microsoft Office/PowerPoint/Excel, Adobe Photoshop/Illustrator, Filmora, Visual Studio, PowerBI, Figma, Azure DevOps. Amazon Web Services (AWS)
- **Language** : Malay (Native), English (Fluent)

EDUCATION

Bachelor's in Computer Science (Hons),
Major in Software Quality, Minor in Financial Management **09/2022-Present**
PETRONAS University of Technology (UTP), Perak

- PETRONAS Scholar
- CGPA 3.57 / 4.0
- Dean's List (6 semesters)

Foundation of Science in Computer Science **09/2021-09/2022**
PETRONAS University of Technology (UTP), Perak

- PETRONAS Scholar
- CGPA 3.53 / 4.0
- Dean's List (2 semesters)

WORKING EXPERIENCE

PETRONAS Digital Sdn. Bhd. **05/2024-12/2024**
Software Engineering & Testing Intern

- Assisted in the development, testing and optimization of software applications to support digital transformation initiatives.
- Contributed to automation testing frameworks, enhancing the efficiency of software validation processes by 40%.
- Gained hands-on experience with DevOps tools, CI/CD pipelines and cloud-based deployment strategies.

ACADEMIC PROJECTS

Designing and Developing a Travel and Tourism application using Visual Basic 07/2022
A group project for Oh My Code (OMC) Competition 10.0
Position : Chief Security Officer (CSO)

- Designed and develop an application in the travel and tourism industry which had been negatively affected during the COVID-19 pandemic.
- Innovated a user-friendly application which includes the providers for transportation and accommodation.
- Tech Stack: C++, Visual Basic

Designing and Developing a Smart Highway Toll Payment System, SmartToll 01/2025
A group project for Technopreneurship course
Position : Chief Technology Officer (CTO)

- Developed a toll system that automates toll payments using RFID technology and Optical Character Recognition (OCR)
- Designed and developed a user-friendly application using React Native and TypeScript.
- Integrated backend logic using Firebase to simulate secure transactions and vehicle database verification.

Designing and Developing CampusCo: A Ride-Sharing and Peer Vehicle Rentals for Malaysian Higher Education Students Present
Final Year Project (FYP)

- Designed and developed a responsive and user-friendly platform to connect students for ride-sharing and peer-to-peer vehicle rentals.
- Designed a secure authentication system with student verification to ensure platform trust and safety.
- Tech Stack: React Native, TypeScript, Firebase. Node.js, Figma
